

# YouthNet

## Integrating Services for Youth

Ed Scholl  
Deputy Director  
YouthNet/FHI

# YouthNet Key Results

- Research on HIV and RH services provided to young clients found more attention to contraception needed
- Research demonstrated feasibility of reaching at risk youth with integrated services and education

# Lessons Learned

- Youth using VCT, PMTCT, PAC and MCH services have high unmet contraceptive need
- Missed opportunities can be avoided with training, clinic protocols
- Provide as many services as feasible; refer for others

# YouthNet Resources on Services for Youth

- *Annotated bibliography on youth friendly services*
- *HIV Counseling and Testing for Youth: A Manual for Providers*
- *An Assessment of Services for Adolescents in Prevention of Mother-to-Child Transmission Programs*
- *Use of Maternal and Child Health Services by Adolescents in Developing Countries*
